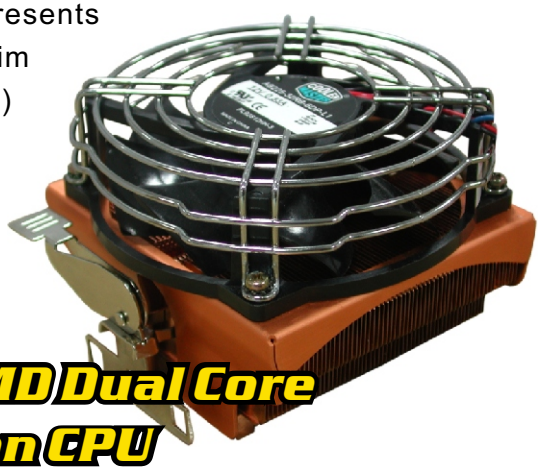
# SUSURRO

www.coolermaster.com

## Introduction

**RR-KCT-T9E1**

"Susurro" means whisper, and perfect in Latin, which totally represents the 16dBA silence of this CPU cooler. Especially designed for slim type system and custom-made for AMD dual core K8 (socket M2) and Opteron CPU, Susurro has been equipped with high quality cooper heatsink that provides excellent heat dissipation. Without the square frame, its 92mm circular fan inhales cool air around it smoothly that achieves the best cooling performance and quiet working environment.



**World NO.1 Solution for AMD Dual Core K8 (Socket M2) and Opteron CPU**

## Features

- Support Dual Core Processor
- Ultra silent 92mm circular fan with thermistor to control fan speed automatically.
- World NO.1 solution for AMD dual core K8 (Socket M2) and Opteron CPU, especially for low profile system.
- Frameless fan structure design is the best silent solution for slim type system.
- Air intakes from top and surroundings achieve excellent heat dissipation.
- High quality copper heatsink and 92mm frameless circular fan for best cooling performance.

## Specifications

ULTRA SILENCE | COPPER | SMART TEMPERATURE CONTROL | UNI DIRECTION | HIGH PERFORMANCE | EASY INSTALLATION | SUPPORT DUAL CORE

| | |
|---|---|
| Model | RR-KCT-T9E1 |
| Socket Type | Socket 754, 939, 940, and M2 |
| Fan Speed | 800 ~ 2800R.P.M. (control by thermistor) |
| Fan Dimension | $\phi$92x25 mm (compatible with 80mm fan) |
| Sound Pressure Level | 16 dBA @ 1 meter, average loading |
| Heat Sink Dimension | 77x92x40 mm (LxWxH) |
| Bearing Type | Rifle Bearing |
| Fan Life Expectancy | 50,000 hours |
| Heat Sink Material | 98% electronic conductivity (99.97% copper purification) |
| Heat Sink Weight | 685 g (without FAN) |
| Fan Weight | 75 g |
| Applications | AMD Athlon™ 64 X2 5000+ and higher |
| | AMD Athlon™ 64 FX FX-59 and higher |
| | AMD Athlon™ 64 4200+ and higher |
| | AMD Sempron™ 3800+ and higher |

Compliant 2002/95/EC RoHS

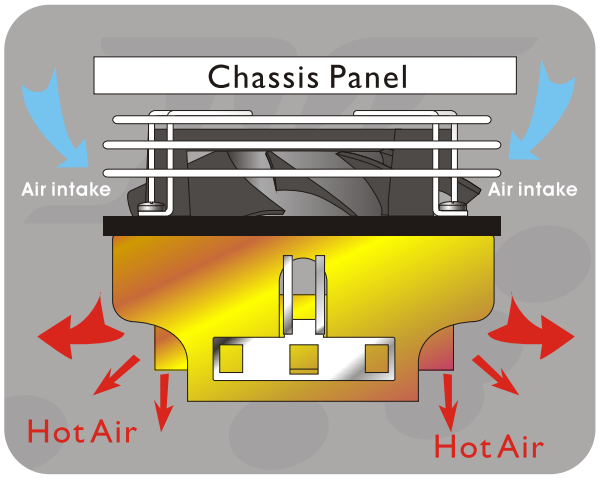
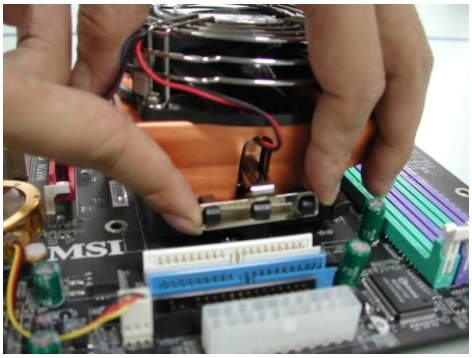
## Best Solution for Slim Type System

**RR-KCT-T9E1**

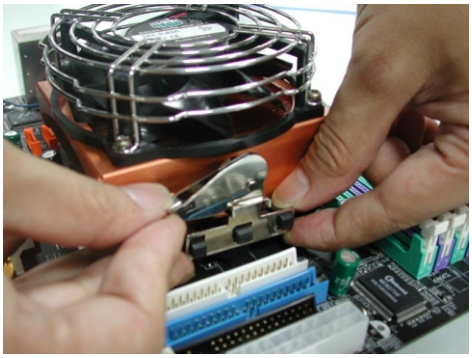


- **World NO.1 solution** for AMD dual core K8 (Socket M2) and Opteron CPU, especially for low profile system.
- **Frameless Design:**
  1. Frameless fan structure design is the best silent solution for slim type system.
  2. Air intakes from top and surroundings achieved excellent heat dissipation..

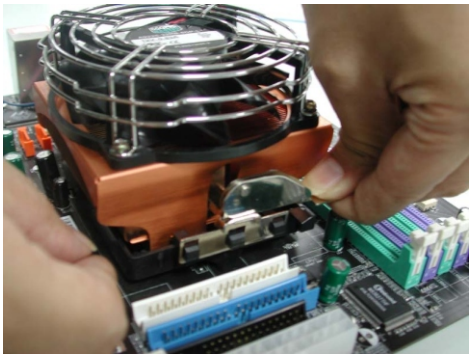
## Easy Installation



- Press and hook the right side of the clip to retention module



- Press and hook the other inflexible side of the clip to the retention module



- Turn off the handle to hook the retention module

## The Spirit of Silence

- **92mm Thermistor Circular Fan:**
  1. Ultra silent 92mm circular fan with thermistor to control fan speed automatically.
  2. High quality copper heatsink and 92mm frameless circular fan for best cooling performance.
